

WE LEAD.
WE LEARN.

WISA®-PARQUET VENEER

WISA-Parquet Veneer is the right quality component as base veneer for three layer parquets. Rotary-cut veneer is peeled from long grown spruce logs and it gives a good balance for three layer parquet construction.

Thickness

2.0 mm thick veneer as standard. 2.6 and 3.2 mm thick veneers available on request.

Quality

Standard parquet quality

Sound knots allowed

Open knot diameter max. 40 mm

Split length max. 500 mm and width max. 10 mm

Veneer sizes

Veneers are cut according to customer specifications. Lengths are possible up to 2540 mm and widths up to 1350 mm. Minimum size is 1200 x 100 mm.

Packaging

Veneer pallets are sealed with plastic foil to secure the right moisture and quality to our customers. Veneers are also protected with plywood boards under and on top of the pallet. Peeling cores are fixed with plastic band under the pallet.

Tolerances

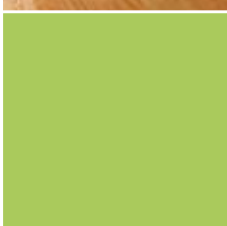

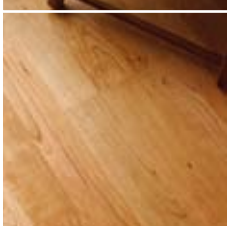

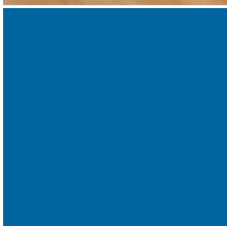

Thickness (mm)	2	+ 0.2 / - 0.1
Length	1200 - 2540	+ 5 / - 0
Width	150 - 799	+ 5 mm / - 0 mm
	800 - 1350	+ 10 mm / - 0 mm
Moisture content (%)	2 - 8	± 2

Veneer properties

Our veneers go through constant quality securing process in all stages of the production. Dimensions, moisture and quality are measured several times to secure the right grade. Thin but strong veneer balances the three layer parquet construction and keeps it straight.

Our production aims to fulfil customer needs and constantly develops products and services in tight co-operation with our sales and R&D department.

Environment

Environmental protection and continuous attention to environmental matters are an inherent part of our daily work. WISA wood products are manufactured from wood raw material supplied by UPM's Finnish forest department from forests managed according to the principles of sustainable forestry. We adhere to strict forestry and felling policies in order to ensure that we operate in a financially, ecologically and socially sustainable way. All UPM's veneer and plywood mills, sawmills and further processing facilities in Finland are ISO 14001 certified and have a valid environmental permit. Kalso veneer mill production, where WISA-Parquet Veneer is produced, is manufactured from PEFC certified wood and all deliveries from Kalso veneer mill are marked with PEFC logo.

Company

Having produced veneer for the parquet industry for over thirty years, our business is based on long-term cooperation. As the leading producer of parquet base veneer, we develop products and methods together with the top parquet manufacturers in the world. The total capacity of 40 million m² makes it possible for us to serve our customers flexibly and reliably.
