UPM Mouldings and Components. A Finishing Touch for a Beautiful Surface.

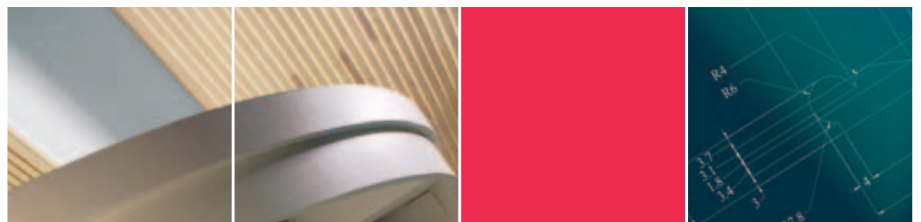

A Finishing Touch for a Beautiful Surface.

We manufacture a full range of standard and special mouldings for interior design in building and construction, joinery and furniture industries.

In addition to a wide selection of standard models, we produce products on request, to fit any measurements or styles. Our production lines are flexible and versatile, the products themselves are delivered ready to be used or as a component for your own production lines.

As one of the world's leading forest products companies, we have worked with wood for over a century, constantly developing products and bettering existing ones. Having decades of experience in producing interior decorations and components, we know wood and we know our business, which is to help your business.

Have a look at our products and get in touch. We promise to produce what you deliver.

A great surface deserves a beautiful finishing.

CUSTOMISED SOLUTIONS bringing efficiency for you

Profiled sections are always manufactured according to your criteria to the agreed level of refining. We place all our expertise for your use, high tool technology and maintenance at the mill allow us to deliver each slot with increasing accuracy. In addition to wide selection of standard special mouldings we provide components for windows, doors, furnitures and projects to meet your requirements:

- The best raw material chosen for each moulding and component use
- Pine raw materials come from our own sawmills, on request other timber species are available
- Constant quality and visual appearance
- A careful drying process that has been developed with years of experience
- Versatile and flexible production lines with quality controls at all stages
- Products manufactured tailor-made
- Excellent machining and working qualities
- Laminated structures on request to obtain straight, durable and very high quality products

Simplify your core processes and produce less waste,

we deliver everything you need from standard products to the most advanced and individually designed profiles. By planning together Just-in-time & door-to-door deliveries arrive per your instructions, offers made and agreements done – no waste delivered when using ready products in correct lengths.

Lengths and Finishing:

- Tailor-made lengths specification, falling or fixed lengths
- Products delivered unfinished or treated surfaces as per requested
- Painted, varnished, colour-tinted
- Customer's own colours possible

Quality packaging protection during deliveries and storage:

- Bundled and shrink-wrapped
- Customer packaging
